

Health and Safety monitoring services

In conjunction with Tunstall Healthcare we can provide solutions to increase the safety for people living independently in their own home. These can include devices such as personal medical alarms, fall detectors, help buttons, smoke, gas and flood detectors and key safes.

Location

Tasmania (coordinated from 24 Sunderland Street, Moonah).

Who can access this service

Frail aged people, people with a mental illness and younger people with a disability.

Referral

Potential clients can contact CBS for more information. Family members/carers, medical practitioners, health professionals or other service providers may refer on the client's behalf with the client's consent.

Program details

Tunstall Healthcare provides assistive technology solutions to support people with a wide variety of care needs to live safely and independently in their own home.

Tunstall Healthcare can provide a truly assistive technology care solution tailored to meet an individual's care needs.

Community Based Support, in conjunction with Tunstall Healthcare, are able to assist with the purchase or rental and installation of:

- Personal medical alarms both monitored and unmonitored.
- Fall detector devices.
- Help Buttons.
- Smoke, gas and flood detectors.
- Key safes.

For more information about the full range of Tunstall products, or to tailor a solution to meet your individual needs, please contact the Community Care team at CBS.

Service cost

All items are available for purchase and some items are available to rent on a yearly or monthly basis. A small fee may also be charged to cover the cost of installation.

The Telecare service provided by Tunstall is charged on a monthly basis.
